DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Saturday, 01 June 2024 at 04:22 Local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Northerly winds across much of the UK will help to maintain generally Low levels of air pollution, with perhaps some pockets of Moderate pollution. There is a chance that gas, from the Icelandic volcanic eruption, may be present at detectable levels in air passing over the UK today and some odour may be noticeable, particularly across England and Wales. Tomorrow: Generally Low levels of air pollution are expected. However, areas of Moderate air pollution are possible across the UK through Sunday, especially across southern areas.

Outlook: Predominantly Low levels of air pollution are expected. However, some pockets of Moderate air pollution may occur.
